Our chemical policy is as follows - Seasons of Long Island, Inc. will supply all the chemicals your pool needs. We will not apply any chemical the customer buys independently. There are thousands of manufacturers of chemicals that make products of differing chemical compounds, concentrations, with multiple fillers and add-ins. Some chemicals can severely stain your pool, cloud your water, and destroy surfaces and equipment. Some applied together can cause grenade like explosions and/or poisonous gases. Some are so watered down that they will barely accomplish anything. For the above reasons we have to strictly adhere to this policy.
